

GIANTS EMPIRE CORPORATION

Institutional Project Development & Corporate Office

EXECUTIVE CHAIRMAN'S MANDATE

Institutional Establishment, Branding, Legal Structuring & Operational Development of
GEC Project Development Company Ltd. (PDC)

TO	Managing Director, GEC Project Development Company Ltd. (PDC) Nana Akwasi Owusu-Ansah
FROM	Executive Chairman, Giants Empire Corporation
SUBJECT	Institutional Establishment, Branding, Legal Structuring and Operational Development of PDC
DATE	18 September 2026

1 Purpose of This Mandate

As we establish GEC Project Development Company Ltd. (PDC) as the project-development arm of Giants Empire Corporation, the Managing Director is assigned responsibility for leading the company's initial institutional build-out.

PDC must not be established merely as another consulting company. It is intended to become a professional project development, structuring and execution-management institution capable of working with governments, development finance institutions, institutional investors, commercial financiers, corporations, entrepreneurs, technical partners and project sponsors.

The immediate objective is therefore to build the systems, legal foundation, brand, operating architecture and commercial engine required for PDC to begin engaging the market professionally. The Managing Director is hereby tasked with leading and coordinating the development of the ten workstreams set out below.

2 Mandated Workstreams

2.1 Full PDC Document System

Develop a complete and standardized PDC corporate and project-document system, covering at minimum the following categories.

Corporate Documents

- Official letterhead
- Internal memorandum
- Corporate profile
- Company presentation
- Meeting minutes
- Board papers
- Management reports

- Official notices
- Internal reports

Project Development Documents

- Opportunity assessment
- Concept validation report
- Project screening report
- Feasibility study
- Technical study
- Market study
- Operational study
- Regulatory assessment
- Environmental and social assessment
- Risk assessment
- Project development plan

Financial & Investment Documents

- Financial architecture document
- Financial model template
- Project information memorandum
- Investment memorandum
- Sources and uses
- Capital structure analysis
- Investor briefing
- Financing strategy
- Due-diligence checklist
- Data-room index

Commercial Documents

- Project proposal
- Expression of interest
- Request for information
- Request for proposal response
- Tender / bid document
- Client engagement proposal
- Terms of reference
- Commercial proposal
- Fee proposal

Execution Documents

- Project management plan
- Project implementation report
- Monthly project report
- Progress report
- Risk register

- Issues register
- Decision register
- Procurement tracker
- Milestone tracker
- Project close-out report

Document Governance

Create a PDC document-control system covering document identification, version control, revision control, approval authority, confidentiality classification, document numbering, archiving, digital storage and data-room structure. The objective is to ensure that every PDC project can be managed through a consistent institutional framework.

2.2 PDC Logo & Brand Identity

Lead the development of the complete PDC visual identity. The brand should communicate professionalism, project development, capital, engineering and institutional credibility, and must be appropriate for communication with governments, DFIs, banks, pension funds, institutional investors, multinational corporations, entrepreneurs and technical partners.

Deliverables

- Primary logo
- Monogram
- Horizontal logo
- Vertical logo
- Black-and-white version
- Digital version
- Print version
- Brand colour system
- Typography
- Logo usage guidelines
- Business document guidelines
- Presentation guidelines
- Social-media identity

Brand Position	PDC — Project Development Company
Tagline	“From Opportunity to Execution”

The final legal name remains subject to ORC name clearance and registration.

2.3 PDC Website

Develop the architecture and content requirements for the official PDC website. The website should position PDC as an institutional project-development platform rather than a conventional consultancy.

Proposed Site Structure

- Home
- About PDC
- What We Do
- Project Development
- Feasibility & Advisory
- Financial & Capital Structuring
- Project Management
- Sectors
- Projects / Pipeline
- Insights
- Partners
- Careers
- Contact

Sector Architecture

The website should communicate PDC's capability across infrastructure, energy, mining and mineral development, agriculture and agro-processing, logistics and mobility, technology and digital infrastructure, urban development, and circular economy and environmental systems, together with all other sectors in which PDC operates.

Additional Requirements

- Content architecture and user journey
- Institutional messaging
- Project submission process
- Client enquiry process
- Investor enquiry process
- Partner registration process
- Privacy and legal pages
- CMS requirements

2.4 Social Media & Content System

Establish PDC's official digital presence across LinkedIn, X, Instagram, YouTube and Facebook as priority platforms, with additional platforms considered based on commercial relevance. Consistent handles should be secured wherever reasonably available.

Content Pillars

- **Project Development** — how projects move from concept to execution
- **Infrastructure & Industrial Development** — analysis of infrastructure and productive capacity
- **Capital & Investment** — project finance, capital structures and investment readiness
- **Technology** — digital systems, AI, ERP, data and project technologies
- **Sector Intelligence** — mining, energy, agriculture, logistics, urban development and circular economy
- **PDC Institutional Story** — people, projects, capabilities and partnerships

Content System Deliverables

- | | |
|------------------------------------|----------------------------------|
| • 30-day content calendar | • Project announcement templates |
| • 90-day content strategy | • Infographic templates |
| • Monthly themes | • Video templates |
| • LinkedIn strategy | • Thought-leadership format |
| • Executive communication strategy | • Case-study format |
| • Corporate announcement templates | |

The objective is not simply to increase followers, but to build institutional credibility and generate qualified relationships and opportunities.

2.5 Business Cards

Develop an executive business-card system for selected PDC personnel, reserved primarily for positions that interact externally with clients, investors, governments and strategic partners — initially the Managing Director, Head of Project Development, Head of Investment & Partnerships, Head of Finance / Commercial, Head of Technical & Engineering, and other approved representatives.

Each card should contain the PDC logo, name, title, telephone, email, website and office location, with an optional QR code linked to the official PDC profile or contact page. No unnecessary information should be placed on the card.

2.6 Legal Registration, Tax & Corporate Compliance

Lead the complete legal establishment of GEC Project Development Company Ltd., coordinating with qualified legal and corporate-registration professionals where necessary.

Registration Workstream

- ORC name clearance
- Company incorporation
- Company constitution
- Shareholding structure
- Directors
- Company secretary
- Beneficial ownership requirements
- Registered office
- Principal business activities
- Corporate records
- Statutory filings

Tax & Statutory Setup

Coordinate the necessary registrations and compliance requirements with the relevant Ghanaian authorities, including the Ghana Revenue Authority (GRA), SSNIT where applicable, VAT and PAYE requirements where applicable, and other sector-specific registrations or licences as required.

Legal Operating Framework

- Client agreement
- Non-disclosure agreement
- Consultancy / advisory agreement
- Project development agreement
- Project management agreement
- Memorandum of understanding
- Joint-venture framework
- Consultant agreement
- Independent contractor agreement
- Procurement terms
- Conflict-of-interest declarations
- Data protection documentation
- Intellectual-property provisions

No regulated financial, engineering, legal or other professional activity should be undertaken by PDC without first confirming the applicable licensing or professional requirements.

2.7 Banking & Financial Control

Establish formal corporate banking for PDC. The Managing Director shall coordinate the opening of appropriate corporate bank accounts after incorporation and completion of the required KYC documentation.

PDC Operating Account	For ordinary corporate operating expenses and receipts.
PDC Project Account	Where appropriate for project-related funds under contractual arrangements.
PDC Collections / Receivables Account	Where commercially useful.

Project-specific SPV accounts should be established separately when projects require them.

Banking Requirements

- Bank-selection criteria
- Account-opening documentation
- Authorized signatories
- Payment approval matrix
- Bank mandate
- Expense authorization
- Procurement controls
- Cash-management procedures
- Monthly reconciliation
- Financial reporting
- Budgeting system

PDC and GEC funds must be maintained with proper accounting separation.

2.8 Marketing, Business Development & Client Acquisition

Build PDC's commercial engine. The objective is to create a repeatable system for identifying, qualifying, converting and managing project opportunities.

Target Market

- **Government** — ministries, MMDAs, public agencies and development programmes
- **DFIs** — development finance institutions and multilateral / bilateral development institutions
- **Institutional investors** — pension funds, insurance companies, investment companies and asset managers
- **Commercial finance** — banks, private capital providers and other financing institutions
- **Corporations** — industrial companies, multinational corporations and strategic investors
- **Entrepreneurs** — project sponsors, founders and businesses requiring development and capital-structuring support

Client Acquisition System

Lead → Qualification → Opportunity Assessment → Meeting → NDA → Project Assessment → Proposal → Engagement → Development → Financing → Execution

A CRM system should be built to track: lead, source, sector, project size, location, sponsor, capital requirement, development stage, probability / status, next action, responsible PDC officer, expected revenue and strategic value.

PDC Service Catalogue

- Concept validation
- Feasibility studies
- Project planning
- Technical coordination
- Financial modelling
- Financial architecture
- Investment preparation
- Regulatory coordination
- Project structuring
- Project management
- Capital mobilisation support
- Development management

The commercial model for each service should be defined, including appropriate fixed fees, milestone fees, retainers, success-based components where legally and commercially appropriate, and project-development / equity arrangements where applicable.

2.9 PDC Operational Flow

Develop the formal PDC operating model. The core workflow proceeds through the following stages: Opportunity → Screen → Validate → Feasibility → Plan → Design → Structure → Finance → Set Up → Execute → Commission → Monitor → Handover / Operate.

Each stage must have defined entry requirements, a responsible department, required documents, a decision gate, approval authority, outputs, a risk review, financial requirements, client responsibilities, PDC responsibilities and exit criteria.

Development Gates

Gate 0 — Opportunity	Should PDC investigate this opportunity?
Gate 1 — Concept	Is the opportunity sufficiently credible?
Gate 2 — Feasibility	Is the project technically, commercially and legally viable?
Gate 3 — Investment	Can the project be structured and financed?
Gate 4 — Execution	Are the conditions for implementation satisfied?
Gate 5 — Operations	Can the completed asset operate sustainably?

This framework, taken together, should become the PDC Project Development Framework.

2.10 Code of Conduct & Corporate Ethics

Develop a comprehensive PDC Code of Conduct establishing standards across the following areas.

Integrity

- Honesty
- Professional conduct
- Accurate reporting
- No misrepresentation

Conflicts of Interest

- Disclosure
- Related-party transactions
- Personal interests
- Gifts and hospitality

Anti-Bribery & Corruption

- Zero tolerance for bribery
- Improper payments
- Facilitation payments
- Undisclosed commissions
- Improper influence

Confidentiality

- Client information
- Investment information
- Financial information
- Project information
- Intellectual property

Professional Standards

- Technical integrity
- Evidence-based analysis
- Independent professional judgement
- Proper documentation

- No manipulation of project data

Procurement

- Fair competition
- Transparent evaluation
- Supplier integrity
- Proper approvals

Information & Data

- Cybersecurity
- Data protection
- Access control
- Document security

Workplace

- Respect
- Non-discrimination
- Professional behaviour
- Health and safety
- Reporting misconduct

Whistleblowing

Establish confidential channels for reporting fraud, bribery, conflicts of interest, misconduct, financial irregularities and abuse of authority.

3 Restructuring of PDC

In addition to the ten workstreams above, the Managing Director shall review the existing PDC structure and propose a formal organizational architecture, establishing the following divisions.

Executive Office	Managing Director
Project Development Division	Concept → Feasibility → Development
Technical Division	Engineering → Design → Technical Assurance
Finance & Commercial Division	Financial Models → Commercial Analysis → Capital Structure
Legal, Regulatory & Risk	Contracts → Compliance → Risk
Project Management Division	Planning → Procurement → Execution
Investment & Partnerships	Investors → DFIs → Government → Strategic Partners
Digital & Data	Project Systems → Analytics → Digital Project Management
Corporate Services	Finance → HR → Administration → IT

The Managing Director shall provide a proposed organizational chart, staffing requirements and phased recruitment plan.

4 Expected Management Deliverable

The Managing Director shall consolidate the work into a formal PDC Institutional Establishment & Operating Plan, containing the following twenty-two components.

- | | |
|----------------------------------|-------------------------------------|
| 1. Corporate structure | 2. Legal structure |
| 3. Organizational structure | 4. Service catalogue |
| 5. Brand strategy | 6. Document system |
| 7. Website architecture | 8. Digital strategy |
| 9. Business-development strategy | 10. Client-acquisition system |
| 11. Banking structure | 12. Financial controls |
| 13. Operational workflow | 14. Project-development methodology |
| 15. Code of Conduct | 16. Governance framework |
| 17. Human-resource requirements | 18. Technology requirements |
| 19. Implementation budget | 20. Implementation schedule |
| 21. Key risks | 22. Management recommendations |

5 Management Standard

PDC must be established to a standard that allows the company to sit across the table from each of the following counterparties and speak fluently in their language.

A Government Ministry	the language of public development
A DFI	the language of development impact, bankability, risk and project finance
A Commercial Bank	the language of cash flow, security, debt service and repayment
An Institutional Investor	the language of returns, risk, governance and capital allocation
An Entrepreneur	the language of opportunity, execution and growth

This is the standard against which the institutional build-out should be measured.

6 Reporting to the Executive Chairman

The Managing Director shall provide regular progress reports to the Executive Chairman covering the following.

- Completed activities
- Activities in progress
- Outstanding decisions
- Regulatory issues
- Financial requirements
- External engagements
- Risks
- Recommended actions
- Upcoming milestones

No major legal commitment, borrowing arrangement, equity issuance, material expenditure or external representation on behalf of GEC / PDC should be undertaken outside the approved authority structure.

7 Final Directive

The purpose of this assignment is not simply to register PDC, create a logo and open a bank account. The objective is to build the institutional foundation of a project-development company capable of originating, developing, structuring and executing serious projects.

The standard should therefore be:

Institutional • Credible • Bankable • Scalable • Governed • Execution-Oriented

PDC must be built with the discipline required of an institution that intends to work alongside serious capital providers and project sponsors. The work should begin with the legal and organizational foundation while the brand, document system, commercial architecture and operating framework are developed in parallel.

“From Opportunity to Execution.”

KWAKU ADU-AGYEMANG

Executive Chairman
Giants Empire Corporation
